toils

**(SPOKEN) Leaving my family in Geneva, I travelled to attend to my studies at the University in Ingolstadt, full of dreams and hope, determined to learn the secrets of Aldini and the Galvinists.**

23 MONOLOGUE STARTS

But what began as a noble journey quickly became a compulsion. I grew to believe that I, and only I could infuse life where life no longer existed.

28

My intoxication caused my waking hours to be filled with the occupation of scavenging the charnel houses and graveyards of the city, searching for the necessary elements to create what I believed would be the greatest gift to man.

32

Sleep, became impossible, every part of my soul committed to my unholy task. No longer able to rest, my thoughts blurred.

35

I set about the final preparation of what has now become my destiny. All things were to be aligned - the storm, the lightning - reality and imagination - one.

40

He was magnificent - a beautiful being - the realization of my life's plan.

44

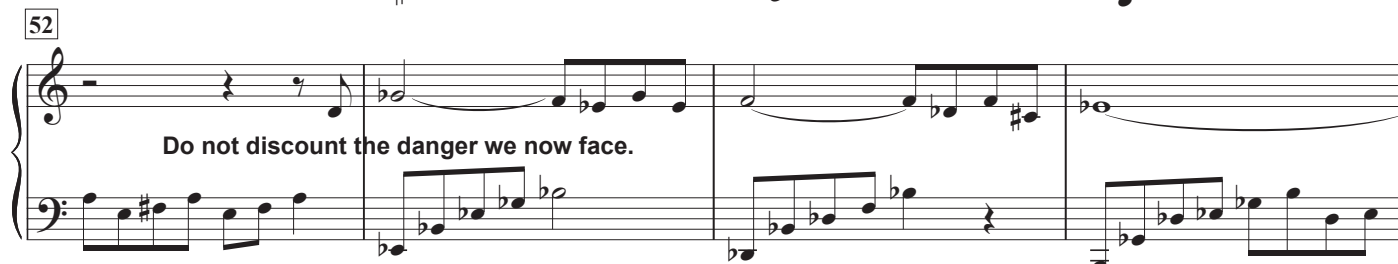

I assure you Walton, had events not occurred as they have, I would not be with you now, but alas, my own ambition overtook the sense of my activity.

48

Hear me, listen, I will tell you a tale that is beyond belief, but true nonetheless.

52

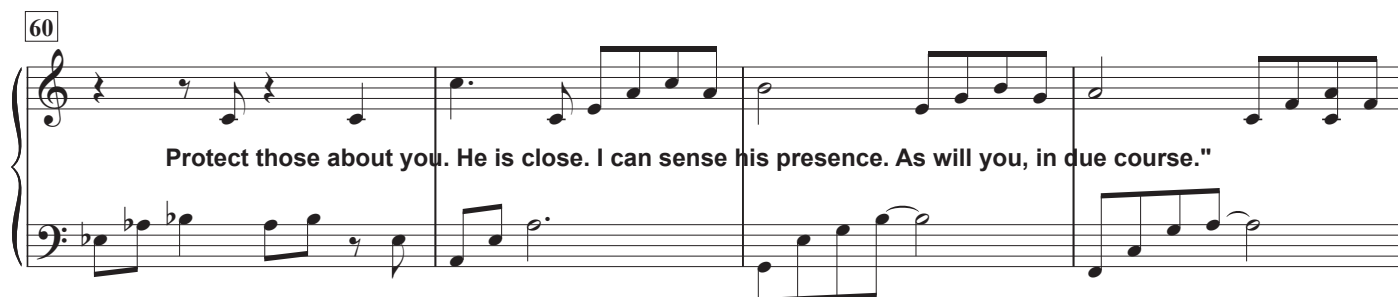

Do not discount the danger we now face.

56

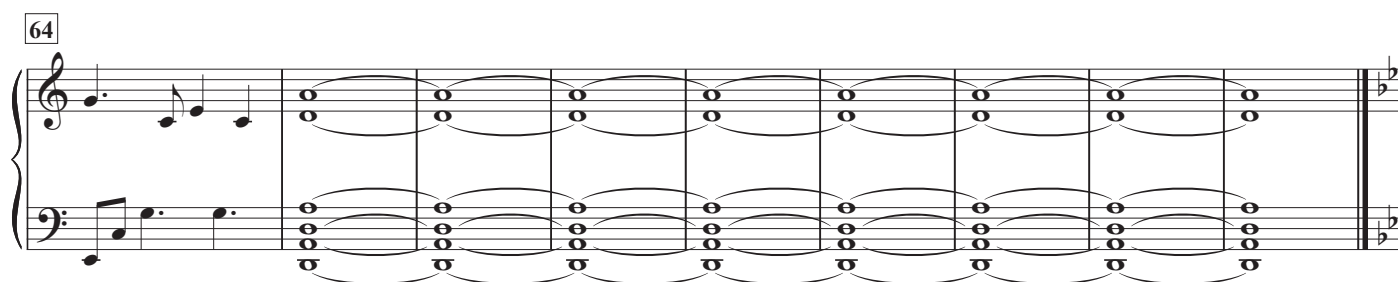

You must believe me.

60

Protect those about you. He is close. I can sense his presence. As will you, in due course."
